

**Dunbar/Spring Neighborhood Foresters Yard Tree Sale
& and help planting the tree
ORDER FORM**

*Must be turned in along with payment by midnight Wednesday, September 21st
to Brad Lancaster at 813 N. 9th Ave., Tucson, AZ 85705
NeighborhoodForesters@gmail.com
Make checks out to "Brad Lancaster"*

Each tree costs \$35 and will be delivered to your home by September 24, 2022.
We can provide advice on ideal location to plant the tree and help in selecting best tree for your space.

Volunteers will be available to help plant tree(s) within a water-harvesting basin for those in need. Availability of planters will depend on demand and number of planters who volunteer.

You will be responsible for the care of the tree. It will need to be watered three times a week for the first month, then at least one good watering per week after that (especially when things heat up again) until the tree is established. Establishment takes from one to three years.

Before Planting Your Trees

You must obtain approval from property owners and/or site custodians. Plant trees at least 10 feet from sewer lines, 5 feet from water lines, and 3 feet from other utility lines. Do not plant under overhead lines.

Call Blue Stake clearance, marking underground utility lines at 811 – this is a free service.

The following native trees are available. We provide native trees as they are low-water-use, and the best adapted to our local climate, soils, and wildlife:

LIMIT THREE TREES PER PROPERTY

Be sure to select an alternate tree(s) – mark “ALT”, because sometimes the nurseries are out of stock of a species or two.

Quantity	Size	Variety	Description
	5 gal	Velvet Mesquite (<i>Prosopis velutina</i>)	Moderate-fast growth to 25' tall & wide; winter semi-deciduous; yellow flowers; high pollen; seed & pod mulch-production; edible seed pods; medicinal; nitrogen fixer; thorns; multi-trunk; deep roots.
	5 gal	Screwbean Mesquite (<i>Prosopis pubescens</i>)	Moderate growth up to 18' tall; yellow flowers; winter-deciduous; moderate pollen; seed & pod mulch-production; unique-looking edible pods; thorns; multi-trunk; higher water-needs than velvet mesquite.
	5 gal	Foothills Palo Verde (<i>Cercidium microphyllum</i>)	Moderate growth to 20' tall & wide; yellow-green leaves & bark; drought deciduous; edible yellow flowers; seeds edible when green or sprouted (the BEST TASTING of the palo verdes); some thorns. Low water use.
	5 gal	Blue Palo Verde (<i>Cercidium floridum</i>)	Fast growth up to 30' tall; blue-green leaves and bark; drought-deciduous; edible yellow flowers; seeds edible when green or sprouted. Some thorns.
	5 gal	Desert Ironwood (<i>Olneya tesota</i>)	Slow-moderate growth to 25' tall & wide; edible seeds; medicinal properties; evergreen; lavender flowers; spines; nitrogen fixer. Low water use.
	5 gal	Desert Willow (<i>Chilopsis linearis</i>)	Moderate-fast growth to 25' tall & wide; winter deciduous, medicinal properties; attractive pink flowers from spring to fall; low pollen; no thorns; low maintenance; multi-trunk; grey bark; willow-like leaves; slightly higher water use. Moderate growth up to 30' tall; winter deciduous; edible red berries; medicinal; single-trunk; grey bark; curvy branches. Moderate water use (higher water needs than the other native trees).
	5 gal	Canyon Hackberry (<i>Celtis reticulata</i>)	Moderate growth up to 30' tall; winter deciduous; edible red berries; medicinal; single-trunk; grey bark; curvy branches. Moderate water use (higher water needs than the other native trees).
	5 gal	Cat Claw Acacia (<i>Acacia gregii</i>)	Moderate growth to 20' tall & wide; winter deciduous; grey bark; medicinal properties; yellow flowers; thorns; nitrogen fixer.
	5 gal	White Thorn Acacia (<i>Acacia constricta</i>)	Moderate growth to 15' tall & wide; winter deciduous; red bark; medicinal properties; fragrant yellow flowers; spines; nitrogen fixer; where allowed, this is the only tree on this list that might fit / be appropriate to plant under power lines. (Creosote bush may be another option in such at context).

PAYMENT

Make checks out to "Brad Lancaster"

Payment and completed, signed form must be turned by midnight Wednesday, September 21st to Brad Lancaster at 813 N. 9th Ave., Tucson, AZ 85705
NeighborhoodForesters@gmail.com

AGREEMENT

Planting & maintenance instructions are provided at time of delivery. I agree that the Neighborhood Foresters its staff, and volunteers are held harmless from all liability associated with tree planting and maintenance. I agree to properly maintain the tree(s) once planted.

I also agree that I will call Blue Stake at 811, by September 21 to get the underground utilities on my property marked for free. This is to avoid accidentally damaging any underground utilities while planting the tree(s).
